Join us for the Exit Seminar for David Merriam, a Ph.D. student working with Associate Professor Dennis Hartigan-O’Connor. David Merriam will complete his Ph.D. in Microbiology this fall.

David was a recipient of the Floyd and Mary Schwall Fellowship Awards his first two years as a Ph.D. student. Since then he has been an active Ph.D. in the lab of Dennis Hartigan-O’Connor on research interest that includes Virus-host interactions in mucosal surfaces, Th17 cells and HIV/SIV.

For his thesis project, he utilized bispecific antibodies to deplete SIV target cells in Rhesus Macaques and also studied the effects of a vaccine therapy using Cytomegalovirus.

You can learn more about this research at his exit seminar on Tuesday, October 22, 2019!

We hope to see you there!
