

MMI 291 Seminar Series – Spring 2018
Emerging Challenges in Microbiology and Immunology
Current Theme: Interdisciplinary Research

**All seminars are held in the GBSF Auditorium (Room 1005) from 12:10 – 1 P.M.
except for April 6 and May 4, 2018 -*seminar will be at MedSci 180C***

April 6, 2018

MedSci 180C

Peter Sarnow, Ph.D.

Department of Microbiology and Immunology, Stanford Cancer Research Institute, Stanford University
“Roles for small noncoding RNAs during hepatitis C virus infection”

April 13, 2018

Gema Mendez Lagares, Ph.D.

Department of Medical Microbiology and Immunology, University of California, Davis
“Protection against SIV using second-generation RhCMV/SIV vaccines”

April 20, 2018

Grant McFadden, Ph.D.

The Biodesign Institute, Arizona State University

“The Long and Winding Road from Poxvirus tropism to Oncolytic Virotherapy”

April 27, 2018

Sarah Stanley, Ph.D.

Infectious Diseases and Vaccinology, School of Public Health, University of California, Berkeley
Presentation title TBA

May 4, 2018

MedSci 180C

Mary O’Riordan, Ph.D.

Department of Microbiology and Immunology, University of Michigan
Presentation title TBA

May 11, 2018

Kimberley D. Seed, Ph.D.

Department of Plant & Microbial Biology, University of California, Berkeley

“Recurring conflicts with a single predatory phage drive the evolution of *Vibrio cholerae*”

May 18, 2018

Hiten Madhami, M.D., Ph.D.

Department of Biochemistry and Biophysics, University of California, San Francisco
“Cryptococcus neoformans: from model pathogen to model yeast”

May 25, 2018

Oren Rosenberg, M.D., Ph.D.

Department of Medicine, Infectious disease, University of California, San Francisco
Presentation title TBA

June 1, 2018

Suzanne Noble, M.D., Ph.D.

Department of Microbiology and Immunology, University of California, San Francisco
Presentation title TBA
